

AF1200P FRAMER

"The LGS Industry's most cost-effective solution for Single Profile Manufacturing"

MANUFACTURING SOLUTION UP TO 1.2mm (18ga)

Suitable for a factory-based operation or on-site mobile facility for precision fast reliable cold rolled Steel Frame Manufacturing

A wide range of LGS construction solutions
Wall Frames | Joists | Trusses | Roof | Ceiling | Header

TYPICAL APPLICATIONS

The AF1200P Framers manufactures LGS frame profiles up to 1.2mm (18ga) thickness for construction projects ranging from single level up to multi-level LGS structures:

- Residential & affordable housing projects
- Multi-storey buildings
- Prefabricated offices
- Bathroom pods
- Modular constructions
- Industrial storage units

PROFILE RANGE

63mm | 75mm | 90mm | 100mm | 140mm | 150mm
2½" | 3" | 3½" | 4" | 5½" | 6"

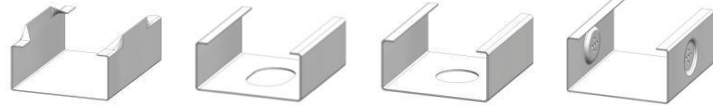

We can also manufacture customized profile web sizes

PROFILE THICKNESS RANGE

The AF1200P Framers manufactures profiles in a thickness from 0.55 (25ga) to 1.2mm (18ga).

ARKITECH have a wide range of optional profile operations.

OPTIONAL TOOL STATION EXAMPLES

Lip Flatten | Elliptical Service Hole | Ø50mm Service Hole | Flange Multi Connection

We can manufacture customized tool stations

ARKITECH AF1200P FRAMER

EXPANDABLE FEATURE - optional tool stations

The AF1200P Framers is equipped as standard with 8 stations and with additional 2 spare tool station bays.

The AF1200P Framers is a fully featured cost-effective machine with all needed tool stations to make this a very versatile manufacturing system.

The AF1200P is a heavy-duty framing machine of robust construction, proven reliability, efficiency and performance.

VARIABLE FLANGE HEIGHT

The AF1200P Framers profile flange heights are variable from 41 (1½") to 51mm (2") with a simple adjustment.

ARKITECH DC2500 DECOILER

The AF1200P Technology Package includes the DC2500 Automatic Feed 2.5 tons (5500lb) decoiler controlled by a laser sensor. The decoiler disposes of a soft stop operation with electronic variable speed in both directions and a hand-held remote control at the AF1200P Framers.

YOUR TECHNOLOGY PACKAGE IS INCLUSIVE OF

- Arkitech Design and Detailing Software License
- Arkitech Manufacturing Software - Installed into the on-board PC/Monitor
- 1 Spare Parts Kits, 1 Pack Consumable Parts and 1 Pack Adjustment Tools
- Commissioning and Training for the AF1200P Framers
- Training Sessions at customer premises for Arkitech Design and Detailing Software
- Software and Framers Technical Support

ARKITECH Precision Light Steel Framing System

Cut | Notch | Dimpled/Screw Rivet | Chamfer | Service Hole | Web Bolt + Index Hole (2) | Lip Cut | Swage
